Profile

I am a backend developer passionate about building efficient and scalable solutions. I have experience with **Node.js**, **Spring Boot**, **MongoDB**, **PostgreSQL**, **Docker**, **AWS**, and developing robust and secure APIs. My approach is focused on **performance**, **code quality**, and **best practices** to ensure efficient and maintainable systems. I seek challenges that allow me to grow technically and contribute to innovative projects. I am proactive, enjoy teamwork, and have a quick learning ability for new technologies.

Employment History

Fullstack Developer, Elepochan (MEI), Jandaia do Sul

JULY 2024 – PRESENT

I work as a freelance backend developer, providing customized solutions for companies and individual projects. My main activities include:

- Developing scalable and secure APIs using **Node.js** and **MongoDB**.
- Implementing **Docker solutions** to facilitate deployment and scalability.
- Integrating systems and optimizing databases to improve application performance.
- Providing maintenance and technical support to clients, ensuring **high availability** and **system reliability**.

Education

Bachelor's , Unicesumar, Maringá

JANUARY 2023 – JULY 2025
